

MULTI-FLIGHT*

MediTek Multi-Flight Stairlifts are designed for straight staircases with intermediate landings or top overruns.

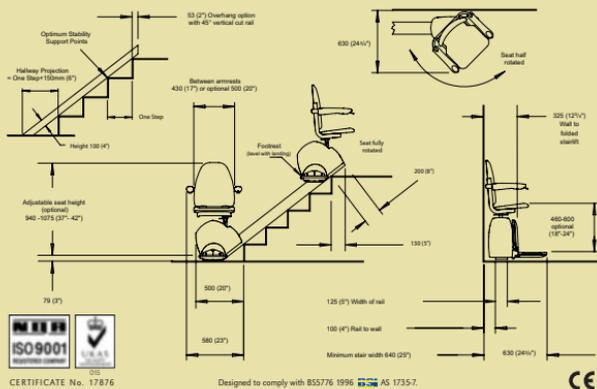

This Modular Design offers the perfect solution for bridging the cost gap between straight stairlifts and made to order curved stairlifts.

* not available in North America.

STRAIGHT STAIRLIFT DIMENSION GUIDE

Lifting capacities up to 160 Kg or 350 Lbs (25 Stone) available.

If you would like to know which MediTek Stairlift is the most suitable for you and your home, please call the number below for a **FREE** survey and no obligation fixed quote.

Stairlifts

© Copyright MediTek Ltd 2018

ENHANCE YOUR HOME AND INDEPENDENCE with MediTek's elegant and stylish new stairlift and realise the full freedom of your home with dignity.

MediTek is pleased to introduce its exciting new compact Stairlift which has been designed to meet the needs of the most discerning user's world wide. With its increased power and class leading control technology you can be assured of the smoothest and safest ride available today.

The introduction of this new and extensive stairlift range further increases MediTek's renowned and unrivalled offering of the highest quality and reliability at a surprisingly competitive price.

MEDITEK SP100

If bending at the hips presents a problem, then the SP100 Stand and Perch stairlift offers a perfect solution.

EXTERNAL STAIRLIFTS

MediTek stairlifts can be adapted for outside use.

Most Stairlifts today use 4, 6 or even 8 supporting rollers, but for long life and the ultimate smooth gentle and reassuring quiet ride MediTek uses 12.

STANDARD OFFSET MANUAL SEAT SWIVEL

At the flick of a lever, the easy-to-use swivel chair can be manoeuvred into the 45° or 85° position and back again. The essential Seat Offset Feature ensures a safe and easy access to and from the stairlift away from the top of the stairs.

OPTIONAL POWERED SEAT SWIVEL

The optional powered swivel chair is the ultimate choice for comfort and freedom of movement. At the touch of a switch the user is able to move into the parked or swivelled position with total ease.

Offset Seat

Comfortable Low Footrest

BATTERY OPERATION

MediTek stairlifts use safe, low voltage maintenance free battery power (24V DC) which ensures continued operation (on average up to 30 return journeys) in the event of a temporary power outage.

CONTINUOUS BATTERY CHARGING WITH NO TRAILING CABLES

MediTek's unique continuous charging system eliminates troublesome trailing cables or rail end charging stations and ensures the stairlift is charged regardless of where it is parked. This is essential for long battery life (similar to your car) and low operational costs. The time and money saving "Plug & Ride" option overcomes the need for disruptive wiring by simply using a convenient power socket.

Plug & Ride™

STAIRLIFT CONTROL

To control your stairlift either use the simple, user-friendly joystick on the arm of the stairlift, or...

...remotely, by means of an infra-red hand-held controller that requires no unsightly wall-mounted control boxes or cables.

MANUAL FOLDING HINGE TRACK

Where the Stairlift track may obstruct a door or passageway, it is possible to use a Manual Folding Hinge Track. Alternatively for those who want ease of use without the need for extra controls there is the...

POWERED FOLDING HINGE TRACK

This simple solution allows the track to fold up automatically as you ascend the stairs, and then automatically fold down as you descend the stairs. For safety and easy cleaning, both versions have all the moving components mounted neatly and unobtrusively inside the rail.

MEDITEK'S SLIMMEST EVER STAIRLIFT

For compactness individual fold-up armrests, seats and footrest are offered as standard.

LINKED FOOTREST OPTION

This simple solution allows the footrest and seat to be lifted together without bending down.

AUTOMATIC OR MANUAL BRIDGING PLATFORM

Where there are just a few steps in a short bend (or 'fan') at the head of the stairway, there is the option of fitting a Manual Bridging Platform. Alternatively and for the ultimate in ease of use there is the **Battery Powered Bridging Platform**. This worry free and unique design allows the platform to automatically move into the operational (down) position as you ascend the stairs and then automatically fold away as you descend the stairs.

Pressure Sensitive Footrest

TSP Technology

COLLISION DAMAGE PROTECTION (CDP)

Many Stairlifts today have little or no essential carriage protection should a collision occur. MediTek Stairlifts feature a Total Surface Protection (TSP) to provide unprecedented levels of protection, safety and peace of mind. The new TSP technology continuously monitors all the carriage and footrest leading surfaces so a controlled emergency stop can be activated should an obstruction be encountered.

THE BEST GEARBOX WARRANTY

For Strength, Durability and Long Life the "Rock Solid" Cast Iron Gearbox is the best in its class. And as this is the most critical, hard working and virtually only moving part at the heart of your Stairlift, it comes with a Cast Iron Guarantee.

DIAGNOSTIC DISPLAY PANEL

To allow a diagnosis without an engineer, MediTek has developed a time and money saving Self-Diagnostic System which can both identify and clearly display any fault which may occur, or report on its operating condition.
